

## THE UNIVERSE EXPLAINED

By Wayne Visser

According to scientists  
The world's made of string  
That buzzes and fuzzes  
Or some such strange thing

It's also a donut  
That curls round a hole  
With middles and riddles  
Just like a fish bowl

And there's no mistaking  
It's more than 3-D  
With twenty or plenty  
Dimensions unseen

Still others insist  
It's really a bubble  
That's popping and bopping  
As seen by Hubble

It started with a bang  
And speeds to its goal  
Of whirling and swirling  
Into a black hole

My view is different:  
The whole galaxy  
Is milky and silky  
And spins around me!
